

Elevator Kit, AE-xA Series

- ★ Enable To Mount A Larger Size of Antenna In the Small Tower
- ★ Easy Installation and Adjustment

This AE-x series is an elevator kit enable to lift up and down antenna unit smoothly and speedy using a small winch unit. It makes it possible to proceed the antenna installation work easily since the elevator track can lift down to the extreme lower level above the ground. It can mount even a larger antenna that exceeds the limit of the tower can handle if user makes it practice to lift down the antenna when it is typhoon season or when wind is strong. The structure of the elevator is simple since the mechanism of this elevator truck ascend and descend along with 2 rails that are vertically mounted along with one side of tower face. It contributes a lot not only for easy installation but also for easy maintenance too. This elevator kit can be installed also after the case that the tower has been already constructed.

Model No.	Applicable Tower
AE1A - 11C	KT11C
AE1A - 13C	KT13C
AE1A - 15C	KT15C
AE1A - 18C	KT18C
AE2A - 15	KT15R
AE2A - 18	KT18R
AE2A - 20	KT20R
AE2A - 22	KT22R
AE3A - 5	KT5M
AE3A - 6	KT7M
AE4A - x AE5A - x	KT - S, SR Series
AE6A - x AE7A - x	KT - 50S, SR Series

Elevation Motor ED-150-x

This ED-150-x is the winch of electric motor type, that can drive to ascend and descend the elevator truck easily and speedy.

Model No.	Applicable Tower
ED - 150 - 1	KT - N, M, C Series
ED - 150 - 2	KT - R, S, SR Series
ED - 150 - 3	KT - 28SR other

	ED - 150 - x
Antenna Weight	100 kg
Ascent/Descent Speed	Approx. 10m/min.
Power Required	100V AC / 5A
Weight	20 kg

* Elevator wire is optional.
